Unit trusts should be considered a medium- to long-term investment. The value of units may go down as well as up. Past performance is not necessarily an indication of future performance. Unit trusts are traded at ruling prices. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. *Performance (where applicable) is quoted from Morningstar for a lump sum investment using Class A NAV prices with income distributions reinvested. Performance figures are quoted after the deduction of all costs incurred within the fund. Namibia Asset Management does not provide financial advice.
